Claim 2 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. "predicting a retention time of the compound of interest from the preparative scale HPLC column" renders the claim indefinite.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over either Collins (WO 01/90739) or Collins (U.S. Patent Pub. 2002/0023878) in view of Abedi (U.S. Patent No. 6,413,431). At best, the claims differ from Collins (WO 01/90739) or Collins (U.S. Patent Pub. 2002/0023878) in reciting determining the R_f value using thin layer chromatography. Abedi (U.S. Patent No. 6,413,431) (column 3, lines 6-17 and column 4, lines 55-67) discloses that R_f on a thin layer chromatograph is interchangeable with the retention times on an analytical column for correlating to a preparative HPLC protocol. It would have been obvious to determine the R_f value using thin layer chromatography in either Collins (WO 01/90739) or Collins (U.S. Patent Pub. 2002/0023878) because Abedi (U.S. Patent No. 6,413,431) (column 3, lines 6-17 and column 4, lines 55-67) discloses that R_f on a thin layer chromatograph is interchangeable with the retention times on an analytical column for correlating to a preparative HPLC protocol.

Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Collins (WO 01/90739) or Collins (U.S. Patent Pub. 2002/0023878) in view of Abedi (U.S. Patent No. 6,413,431) as applied to claims 1-5 above, and further in view of Afeyan (U.S. Patent No. 6,344,172). At best, the claim differs from either Collins (WO 01/90739) or Collins (U.S. Patent Pub. 2002/0023878) in view of Abedi (U.S. Patent No. 6,413,431) in reciting use of an artificial neural network. Afeyan (U.S. Patent No. 6,344,172) (column 14, lines 13-45) discloses use of an artificial intelligence program recognizes patterns and allows for the elimination of manual or piecemeal preparatory steps. It would have been obvious to use artificial intelligence in either Collins (WO 01/90739) or Collins (U.S. Patent Pub. 2002/0023878) in view of Abedi (U.S. Patent No. 6,413,431) because Afeyan (U.S. Patent No. 6,344,172) (column 14, lines 13-45) discloses use of an artificial intelligence program recognizes patterns and allows for the elimination of manual or piecemeal preparatory steps.
